PATH TO INNOVATION

Hancock Signature Solution® (HSS) – Electronic Signature and Form Builder

Hancock Signature Solution® (HSS) incorporates electronic signature capture, binding, authentication, and verification of digital documents with the already powerful ScanSharp® imaging and Optical Character Recognition (OCR) software. Thousands of businesses across the world are saving time and money by replacing paper processes with electronic signature and document solutions. Why not join them?

Existing documents and forms such as medical forms, financial documents, and security credentials can be easily uploaded into the HSS software for electronic signature capture and binding. The resulting digital document contains the original document, electronic signature, and a date and time stamp for authentication, all in one. The Hancock Signature Solution® works seamlessly with all the other INUVIO™ products including ScanGlobal® for IP / LAN / WAN networking and remote server access and storage.

HSS electronic documents can capture signatures and date / time stamps from any electronic hardware such as USB signature pads and/or digital device such as smart phones like the iPhone, tablets like the iPad, and touch screen computers. Applications vary from healthcare such as doctors, dentist, vision, labs, and pharmacies, to financial such as banks, mortgage, transportation, and insurance, to security such as law enforcement / government, education, and entertainment, to small office / home office, tax receipts, and beyond. HSS can help you go paperless today!

Features

- Electronic Signature Capture, Binding, and Authentication
- Form Builder Inserts any PDF Form or Document
- Your Choice of Hardware from USB Signature Pads to Smart Phones to Tablets to Touch-Screen Computers
- “Check Box”, “Fill in the Blank” and “Auto-Populate”
- Combine ScanGlobal® for Networking and Server Storage
- Resulting PDF Documents Include Legal Date/Time Stamp
- Meets “Meaningful Use” and EHR/EMR Requirements
- Windows® XP, 2003/8 Server, Vista®, and 7 (32/64 Bit)
- Hardware Requirements:
