PATH TO INNOVATION

ScanGlobal® – Remote Scanning, Sharing and Storage Application (Host App)

ScanGlobal® allows one piece of imaging hardware or “scanner” to be shared over a network with other users (IP, LAN, WAN) similar to the common practice of sharing printers. With ScanGlobal®, imaging hardware on any workstation can be accessed by any software running on a vWorkspace, Terminal Services or Citrix® remote server. ScanGlobal® allows enterprise document management software like ScanSharp® to network with any imaging hardware increasing overall cost-savings and efficiency.

ScanGlobal® allows users to scan directly from their workstation to a server without shared folders or jeopardizing network security. ScanGlobal® offers seamless and solid image and document scanning and acquisition over complex network environments with no noticeable increase in scanning time even when used with high-speed hardware. ScanGlobal® fully addresses the need for scanned documents to be shared and stored on a remote server in any business with distributed office locations.

Image scanning and Optical Character Recognition (OCR) applications vary from healthcare such as doctors, dentist, vision, labs, and pharmacies, to financial such as banks, mortgage, transportation, shipping, and insurance, to security such as legal, law enforcement, government, education, and entertainment, to small office / home office such as tax receipts and retail, and beyond. ScanGlobal® is the answer to all your remote scanning and security needs.

Features

- Share Imaging Hardware Over Network with Other Users
- Accessible by vWorkspace, Terminal Services or Citrix®
- Combine with ScanSharp® for Network Image Scanning
- Network ScanOCR® Optical Character Recognition (OCR)
- Scan and Store Documents Directly to Remote Server
- No Noticeable Increase in Scan or OCR Processing Time
- Share and Store Images among Distributed Offices
- Meets “Meaningful Use” and EHR/EMR Requirements
- Windows® XP, 2003/8 Server, Vista®, and 7 (32/64 Bit)
- Hardware Requirements:
 - Intel Pentium® III 933 MHz
 - 512MB RAM (1GB Recommended)
 - 400MB Hard Disk Space)

Benefits

- i Networkable** – Quickly and easily scan, share and store images and documents over your IP / LAN / WAN network locally or among distributed offices.
- i Accurate** – Combine with ScanSharp®, ScanOCR® or ScanSign® to recognize, translate, transfer, and store images and OCR data directly to a remote server.
- i Efficient** – Share a single network device with multiple users with no increase in scan imaging or Optical Character Recognition (OCR) processing time.
- i Compatible** – Use to network imaging hardware or “scanner” in your choice of environments from vWorkspace, Terminal Services, Citrix® and others.

i INUVIO’s Industry-Leading 24-Month Warranty*
