INUVIO™
PATH TO INNOVATION

ScanOCR® – Optical Character Recognition Software

ScanOCR® (Optical Character Recognition) allows you to fully automate information capture, improving speed and accuracy in processing and preventing unnecessary errors. Optical Character Recognition (OCR) doesn't image information like text, but "reads" it and provides editable text to other computer applications automatically. The data can be used to auto-populate fields in CRM (Customer Relationship Management), PM (Practice Management), or any other Document Management software or database.

ScanOCR® can also read magnetic stripes or bar-codes and provide that data to third-party applications as well. Our proprietary digital signal processing algorithms clean and filter images even though they may contain watermarks, stamps, or holograms. Only INUVIO can offer you our proprietary OCR technology that not only knows what it is reading, but exactly what to do with it. ScanOCR™ is the accurate and efficient answer to all your text and language capture, translation, manipulation, and transfer needs.

ScanOCR™ software is designed to work well with all TWAIN compatible scanning and imaging hardware. Applications vary from healthcare such as doctors, dentists, vision, pharmacies, and labs to financial such as banks, mortgage, insurance, shipping, and automotive to security such as law enforcement / government, education, transportation, entertainment, and staffing to small office / home office, tax receipts, and beyond.

Features
- Reads medical and ID cards, documents, checks, etc.
- Reads text on insurance cards such as ID number, group number, copay, dates, deductible and more
- Reads text on driver's license such as name, address, date of birth, height, weight, sex, race, and more
- Auto-populates info into Customer Relationship (CRM) and Practice Management (PM) application fields
- Meets "Meaningful Use" and EHR/EMR Requirements
- Windows® XP, 2003/8 Server, Vista®, and 7 (32/64 Bit)
- Hardware Requirements:
    - Intel Pentium® III 933 MHz
    - 512MB RAM (1GB Recommended)
    - 400MB Hard Disk Space)

Benefits

Efficient – Offers dual-sided scanning of any size document (depending on hardware) like laminated medical and ID cards with embossed characters.

Accurate – Scans and reads up to 600dpi for clear and accurate images and data in your choice of formats including PDF, JPG, BMP, GIF and many more.

Small – Perfect for any size workstation, like medical admissions, security registration, retail POS counters, and small offices / home offices.

Compatible – Compatible with all industry standard TWAIN scanning hardware including thousands of devices worldwide available from INUVIO and others.
