PATH TO INNOVATION

ScanSharp® 6.0 - Scanning and Imaging Software

ScanSharp® software enables customers like doctors, bankers, police and others to capture card, document, receipt, and other hardcopy data in seconds as a digital file. No more hand-keying and photocopying! ScanSharp™ is an imaging application that works in conjunction with a variety of scanning hardware, which we also offer. With ScanSharp®, photocopying is eliminated creating an easier and more efficient workflow for employees and saving time and money for the business.

ScanSharp® automatically detects document insertion, no need to push any buttons or click a mouse. The software automatically crops and combines up to 8 card sides into one image. ScanSharp® also gives you the option to automatically save into one of 9 different file formats and the ability to add a date and time stamp to the digital and/or printed image. All of which takes place in just a matter of seconds. ScanSharp® is the accurate and efficient solution to all your image and data capture needs.

ScanSharp® software is designed to work well with all TWAIN compatible scanning and imaging hardware. Applications vary from healthcare such as doctors, dentists, vision, pharmacies, and labs to financial such as banks, mortgage, insurance, shipping, and automotive to security such as law enforcement / government, education, transportation, entertainment, and staffing to small office / home office, tax receipts, and beyond.

Features

- Scans medical and ID cards, documents, checks, etc.
- Merges up to 8 card images/sides into a single image
- Auto-detect creates perfectly cropped/shaped images
- Save in 9 different file formats such as JPG, PDF, etc.
