

### SOFTWARE SOLUTIONS

## SCANSHARP® 6.0

Say Good-Bye to Paperwork, Copiers and Manual Data Entry. With INUVIO's ScanSharp software, free your physician practice from the inordinate amount of time required to collect, copy and manually re-enter patient data.

ScanSharp is an easy-to-use digital scanning and imaging software application that enables the scanning of all types of patient documents and the seamless integration of this critical information into your PM/EMR. ScanSharp works with a variety of digital scanning hardware to capture critical patient data in seconds eliminating photocopying, improving practice workflow (or accelerating patient inflow), eliminating data entry mistakes and over the course of a year, saving your practice hundreds of man hours in time and labor.

ScanSharp automatically detects when a document is inserted and begins the scanning process so there is no need to push any buttons or click a mouse. ScanSharp software is designed to work well with all TWAIN compatible scanning and imaging hardware. ScanSharp is the perfect choice for the data capture needs of doctors, dentists, vision providers, pharmacies and labs.

## BENEFITS

- > **EFFICIENT** – Offers dual-sided scanning of any size document (depending on hardware) including laminated medical and ID cards with embossed characters.
- > **SMALL** – Perfect for all types of work environments or workstations such as medical admissions, security registration, retail POS counters and small offices / home offices.
- > **ACCURATE** – Scans up to 2400 dpi (depending on hardware) for clear and accurate images in your choice of file formats such as PDF, JPG, BMP, GIF and other varieties.
- > **COMPATIBLE** – Compatible with all industry standard TWAIN scanning hardware, including thousands of devices worldwide available from INUVIO and others.

# SCANSHARP® 6.0 FEATURES

## › Document Compatibility

Digitally capture all types of patient information, including drivers licenses, insurance cards, medical records, consultation notes, lab requisitions and results, patient demographic information, consents and integrate it all seamlessly into your PM/EMR.

## › Scanning Automation

Immediately scans once a card or document is inserted into the scanner without pressing a button. Automatically crops any size image for clean scans with no black borders Auto-save to a directory of your choice on a local computer or server.

## › Workflow Options

Merges both sides into a single image so all data is visible on screen. Unlimited configurations for complete customized workflows. Create multiple configuration settings. Scan up to 8 sides into a single image.

## › Scanning Options

Scan in true color (24bit), grayscale (8bit) or black & white (1bit). Set image resolution from 75 DPI to 1200 DPI (depending on hardware) for ideal image quality and size.

## › File Saving Options

Many popular file formats to choose from – BMP, JPEG, TIFF, GIF, PDF or PNG. Save directly to the clipboard for pasting capability. Automatically saves with a static name, a numerically ascending name or time-stamp. Or manually name the file for complete control. Advanced compression options to control file size.

## › Email Options

Save all scanned documents to PDF format and launch email application ready to send.

## › Printing Options

Auto-print to any printer on network. Auto-print one or multiple copies. Control over where the image appears on the page. Zoom printing up to 300% for easy to read images. Insert data onto the print copy as a header or footer (static text, time stamp or file name and path info).

## › Watermarking Options

Insert data into the image as a header, footer or on the image itself (static text, time stamp or file name and path info).

## › Browse Options

Browse scanner images

## › Meaningful Use

Meets "Meaningful Use" and EHR/EMR requirements.
